Create a
great BIG scene

(no, not that kind)

Create an underwater scene featuring all your favourite sea creatures.
Here are some great examples from our recent Happy HabiART competition entries.

Plan out your scene

What story could you tell?
Are they at risk due to pollution or losing their home due to warming seas?

Research your ideas

Look up what kind of plants, creatures would be in your scene.
What would the landscape look like?
What continent would you find it on?

Decide on your materials
